ABIK VAIDHYA

Göteborg, Sweden | +46-739-810-135 | abikvaidhya@gmail.com | abikvaidhya.com.np
linkedin.com/in/abik-vaidhya

Mobile application developer with 4 years of experience building and maintaining cross-platform apps using Flutter and Dart. Strong background in UI development, API integration, state management, and delivering reliable mobile experiences. Currently expanding skills in Kotlin and Jetpack Compose at an intermediate level.

Work authorization: *Full right to live and work in Sweden — no visa sponsorship required*.

Strategic Highlight and Impacts

- Rescued and shipped 100% of previously stalled Flutter projects at Mutex Tech — taking projects that had stalled indefinitely through to successful publication on the App Store and Play Store.
- Optimized application performance at both companies through targeted work on API call efficiency and local caching strategies, directly improving load times and responsiveness across multiple production apps.
- Engineered performance and reliability improvements to the real-time chat system in Wholistic Minds, a healthcare app connecting doctors and patients — a system where responsiveness directly affects clinical communication.
- Practical familiarity with AOSP concepts and the AOSP build system.
- Improved cross-functional collaboration and delivery velocity at Mutex by working closely with designers, QA, and product stakeholders — contributing to the promotion from Flutter Developer to Lead Flutter Developer.
- Drove a 60% increase in project deliverables at Nipuna Prabhidik Sewa across a portfolio of client apps spanning Dubai and local Nepal-based companies, while simultaneously doubling output on documentation and project-management tasks.
- Resolved 90% of software compatibility issues in existing code bases at NPS, stabilizing applications across client environments and reducing recurring support overhead.

PROFESSIONAL EXPERIENCE

Lead Flutter Developer | May 2023 – Jan 2025

Mutex Tech Pvt. Ltd., Kathmandu

- Built Android and iOS applications with Flutter and Dart for national and international clients.
- Integrated APIs, authentication, and mobile features across client projects.
- Improved application performance through code optimization and caching mechanisms using GetX.
- Contributed to exploratory work on AOSP build flows and platform configuration to better understand how embedded Android images and customization affect application compatibility and runtime behavior.
- Published apps to the Apple App Store and Google Play Store while maintaining platform compliance.
- Debugged issues, provided technical support, and mentored junior developers on state management and UI/UX practices.

Mid-level Flutter Developer | Feb 2021- March 2023

Nipuna Prabhidik Sewa, Pokhara

- Developed and maintained Flutter mobile applications for client companies based in Dubai and local clients.
- Gathered requirements and prepared technical documentation for development teams.
- Implemented new features, modified existing code bases, and optimized existing applications.
- Performed debugging, software testing, and validation.
- Guided junior developers and supervised development work within the team.

Flutter Developer | March 2023 – May 2023 & Jan 2025 - ongoing

Freelancer

I worked as a freelancer, primarily for flutter projects. I am available at UpWork, LinkedIn and Indeed.

- Gathered requirements and clarified deliverables with clients.
- Planned technical approaches, packages, and plugins for project requirements.
- Designed, developed, debugged, optimized and delivered Flutter applications.
- Integrated APIs and third-party services, then tested and validated deliverables.
- Worked on project showcase applications (Pocket HQ, Vehicle Companion, Flutter-Native Hybrid App)

PROJECTS

Pocket HQ

Available in Github | Project Showcase
A simple personal companion app. Log trips, track screen time, take notes, view trip history, and track your habits.

Wholistic Minds

Available in App Store & Play Store | For Mutex Tech
Medical app that links doctors with their patients to help track their progress and health conditions, plus supplements and test records. I was the primary developer for the IOS and Android platform for the project, everything from development, debugging and submission to store.

Pokhara Food Delivery

Available in App Store & Play Store | For Nipuna Prabidhik Sewa
Food Delivery project operating in Pokhara, Nepal. I was a part of the flutter development team.

Vehicle Companion App

Available in Github | Project Showcase
A practical companion app for car owners. Log trips, track fuel/charging costs, set maintenance reminders, view trip history on a map, and explore Bluetooth integration. This project is designed for the strong automotive / connected-vehicle ecosystem in Göteborg and demonstrates real hybrid skills that many Swedish companies use.

Flutter + Native Hybrid App

Available in Github | Project Showcase
A portfolio app that combines a Flutter UI (GetX) with native Kotlin features — device metrics via Jetpack Compose and a Bluetooth LE scanner — connected through platform channels. Built to show real hybrid architecture skills used in production mobile teams.

Fullmoon Mobile App

Available in Play Store | For Mutex Tech
Construction management application currently operational in Nepal. I was involved in development and publishing as well as submission of applications to the play store.

Hotel Night Trails

Available in Github | Project Showcase
A single-page Flutter Web site for a Hotel Night Trails: room gallery, café, front-courtyard parking, and a contact/booking section with an embedded map.

EDUCATION

MBA — Herald International College, Kathmandu
Graduation date: June 2024. **69%** (100%)
BIT — Informatics College Pokhara, Pokhara
Graduation date: November 2018. **3.1 GPA** (4)

LANGUAGES

English: Professional working proficiency (B1/B2)
Nepali: Native / Fluent
Swedish: A2 (currently studying/learning)

TECHNICAL SKILLS

Languages: Dart, C++, Kotlin
Frameworks: Flutter**,** Jetpack Compose, TensorFlow Lite, GetX, BLoC, Riverpod
Backend: REST APIs, JSON, Firebase, Supabase
Local Storage: Hive, Flutter Secure Storage, SQLite
Tools: Git/GitHub/GitLab, Figma, Postman, Jira, Android Studio
Platforms: Android, Linux, Windows, Web
Testing: Unit Testing, Integration Testing, UI Testing
CI/CD: GitHub Actions, Fastlane
